

TINGKAT PENGETAHUAN MASYARAKAT TENTANG VAKSINASI COVID-19 DI DESA PEKUNCEN KECAMATAN JATILAWANG KABUPATEN BANYUMAS

ANISA ANNASTASYA

ABSTRAK

Latar Belakang: *Corona Virus Disease 2019* (Covid-19) menjadi masalah serius di penjuru dunia dan jumlah kasusnya terus meningkat. Selain mematuhi protokol kesehatan, perlu dilakukan upaya lain untuk mencegah penyebaran Covid-19 yaitu melalui vaksinasi. Pelaksanaan vaksinasi yang dilakukan pemerintah terdapat berbagai tantangan dan hambatan yaitu keraguan dan penolakan masyarakat terhadap vaksinasi. Hal tersebut dikarenakan kurangnya pengetahuan masyarakat terhadap vaksinasi Covid-19.

Tujuan: Untuk mengetahui tingkat pengetahuan masyarakat tentang vaksinasi Covid-19 di Desa Pekuncen Kecamatan Jatilawang Kabupaten Banyumas.

Metode: Jenis penelitian ini adalah deskriptif dan metode survei menggunakan rancangan *penelitian cross sectional*. Jumlah responden sebanyak 324. Instrumen penelitian yang digunakan adalah kuesioner dengan teknik pengambilan data *nonprobability sampling* yaitu *purposive sampling*. Analisis data menggunakan analisis univariat.

Hasil: penelitian menunjukkan mayoritas masyarakat Desa Pekuncen Kecamatan Jatilawang Kabupaten Banyumas memiliki tingkat pengetahuan tentang vaksinasi Covid-19 dengan kategori baik dengan presentase 85%. Kategori baik sebanyak 282 responden. Tingkat pengetahuan baik mayoritas di Desa Pekuncen paling banyak pada umur dewasa 92,6%, berdasarkan jenis kelamin yaitu laki-laki 86,3%, dan menurut pendidikan DIII dan DIV/S1 dengan presentase 100%, sedangkan berdasarkan pekerjaan guru, perawat, dan bidan dengan masing-masing presentase yaitu 100%.

Kesimpulan: Tingkat pengetahuan masyarakat Di Desa Pekuncen Kecamatan Jatilawang Kabupaten Banyumas memiliki kategori baik yaitu dengan presentase 85%. Perlu adanya pemahaman dan menyebarluaskan informasi mengenai vaksinasi Covid-19.

Kata kunci: Desa Pekuncen, tingkat pengetahuan masyarakat, vaksinasi Covid-19.

**LEVEL OF PUBLIC KNOWLEDGE ABOUT COVID-19
